Speakers: **Kim Belland and Amol Sagare**

Presentation: **“LEAN”**

There are three major foundation blocks for successful 5S & Lean implementation, employee engagement, training & robust system to collect data and track progress. So If you are using, a paper based system, that means some one is manually filling the form, then that is passed on to the manager, stuck in a file or folder, faxed off to wherever, or just left on a desk, not the most efficient method. Secondly to process gathered data, you may be using spreadsheets then to create reports excel, PowerPoint or kind of similar software is used. Well this is also a basic manual process which takes significant time. Unfortunately if columns are miss sorted or cells are over ridden resulting in crippled formulas, this could result in loss of data, a state of frustration. Also spreadsheets are typically inconvenient when shared with multiple users, especially with staff being in different divisions, different departments, or even different locations, again not very efficient method.

So If you are currently experiencing any of this then I have got an Important message for you “There is a better way”. By using the 5SLeanDash software, you can save money, improve performance, foster team environment and improve individual participation and accountability by just leveraging the critical business insights that only a web based management system can uncover.

5SLeanDash is a web based software solutions that with its beautifully designed user friendly interface brings information at finger tips and change the way how 5S & Lean program is managed across entire organization locally & globally.

If you want to know more about 5SLeanDash and how it can help “Fast Track Your Lean Journey” meet us at ASQ dinner meeting on 17th Jan 2018.
